INTRODUCTION

Project profile

- System requirement
 - Existing system
 - Proposed system
 - Project guide
-

System Requirement

Software Used:

- **Front End:-** Python with Django
- **Back End:-** SQLite

Existing System

- Generally, the system now has only one feature to upload the documents and giving grades on uploaded documents by students, or faculty sharing the general announcements of any activity so that student can participate in it.

Proposed System

- Students can able to check the faculty is available or not.
- Students and faculty can also upload the study material.
- Students can draft the query or message.
- All students and faculty both can write information or solution about issue and students can also allowed to solve the query in group.
- Faculty can join more than one stream.
- Students can give attendance as well as they can check attendance and also faculty have to give attendance so that students can check.

Proposed System

- Students can search for the study material for different stream and topics into the system.
- If students have any doubt, then they can ask it through feature of QA box.

Modules

- Time table
 - Subject selection
 - Upload
 - QA box
-

Time Table

- Timetable has information about which faculty taking which lecture at which time.
- So that student can select subject according to timetable and they can know the faculty is available or not.

Subject Selection

- After checking timetable students can select any one subject like(c++, java, PHP).
- After select any one subject they will get information about selected subject.

Upload

- Students can upload any documents like(.pdf, .doc, .png).
- Faculty and students can able to share any document.
- Students can check any document is uploaded or not from the faculty.

QA box

- QA box is very useful for students to ask questions.
- Whenever students have any doubt then they can post their question in the QA box.
- After posting question, if any other students can solve that doubt than they can do or faculty will solve it.

CONCLUSION

- Thus we conclude that we enjoyed very much working on the project “ETUDE PLUS” our internal guide Prof. Neha Vaswani helped us a lot in improving the quality of our project.
- This is just the stepping stones for project development there is new paths to be discovered and there are new goals that are to be archived.
